

# OUR ABILITY IS **YOUR HERD'S** MOBILITY

Hooftrimming Ltd was set up in 2005 by Steve Jones, a NACFT-accredited hoof trimmer. Using the latest techniques, Steve provides farmers and vets nationwide with a timely, comprehensive hoofcare service.

Since 2002, Steve has also been experimenting with the modification of crushes to enhance their performance. Years of technical and practical experience has culminated in our very own range of bespoke hooftrimming crushes to suit both farmers and professionals.

Using superior engineering and top quality parts, our crushes are all built in-house to a very high standard and we offer a reliable after-sales service to help guide you through any problems you may have.

From our warehouse in Cheshire, we also offer one of the widest range of cattle hooftrimming supplies and accessories in the UK. From protective clothing to knives, grinders, bandages, hoof care products and everything inbetween, we can offer customers a reliable, next-day delivery service on most products at very competitive prices.

## HTL STATIC ELECTRIC HOOFTRIMMING CRUSH

Designed without compromise and built in-house, the HTL Static Electric Hooftrimming Crush provides optimum cow and trimmer comfort. From the lead-in rear gates, through to the adjustable self-locking head gate and with five electric hoists for legs and bellyband lift, this crush combines maximum safety with ease of use and high through-put.

The over-sized, spring-assisted rear rump bar ratchets down behind the cow and holds hind legs firmly, but comfortably, to ensure maximum control. The addition of a rear rump chain means this crush may also be used for AI and vet inspections.

The wide rubber bellyband folds nicely around the cow and is located to ensure a comfortable support position. The large diameter tubing on the head gate increases cow comfort, and the fully opening exit means there are no obstacles for the cow to manoeuvre over on her way out.

The electric hoists have been tried and tested in the field for many years and have proven to be a reliable source for controlled load lifting. We stock a comprehensive range of spares to ensure limited down-time in the unlikely event of a breakdown.

### OPTIONAL EXTRAS

#### Work Lights

An LED work light above each foot aids visibility and increases operator safety.

#### Grinder Holder/ Swing Over Arm

This arm allows the operator to plug in and hang their grinder up safely and move it around the crush with them, eliminating the need for extension cables or trailing wires.

#### Side-opening Panels

Provides full access to the cow for vet inspection/procedures, clipping, mothering, etc.

#### Non-slip Rubber Flooring

Our bubble top rubber matting improves cattle comfort and stability.

#### Stabiliser Boards

These bolt-on stabiliser boards provide extra width at the rear of the crush to prevent cows stepping outside and, thus, unbalancing themselves.

### FEATURES & BENEFITS

- Strong, ergonomically designed galvanised steel frame construction
- Adjustable self-locking head gate
- Electric front leg lifts with wooden leg support blocks
- Galvanised steel tread-plate flooring
- Wide rubber bellyband with electric hoist system
- Side plates
- Electric rear leg lift
- Spring-assisted rear rump bar
- Rear rump chain
- Two-section galvanised steel rear gates
- 2 x IP56 single 3-pin electrical outputs

### TECHNICAL SPECIFICATION

#### Maximum External Dimensions (With No Optional Extras)

- 2.0 metres long- not including rear gates
- 1.4 metres wide
- 2.1 metres high

1.7 metres internal height

Weight = Approx. 500kgs

220/240V
