

OUR ABILITY IS **YOUR HERD'S** MOBILITY

Hooftrimming Ltd was set up in 2005 by Steve Jones, a NACFT-accredited hoof trimmer. Using the latest techniques, Steve provides farmers and vets nationwide with a timely, comprehensive hoofcare service.

Since 2002, Steve has also been experimenting with the modification of crushes to enhance their performance. Years of technical and practical experience has culminated in our very own range of bespoke hooftrimming crushes to suit both farmers and professionals.

Using superior engineering and top quality parts, our crushes are all built in-house to a very high standard and we offer a reliable after-sales service to help guide you through any problems you may have.

From our warehouse in Cheshire, we also offer one of the widest range of cattle hooftrimming supplies and accessories in the UK. From protective clothing to knives, grinders, bandages, hoof care products and everything inbetween, we can offer customers a reliable, next-day delivery service on most products at very competitive prices.

HTL STATIC MANUAL HOOFTRIMMING CRUSH

Ergonomically designed without compromise and featuring exceptional build quality, the HTL Static Manual Hooftrimming Crush provides an economical, yet safe, solution for everyday hooftrimming needs.

The strong, galvanised steel frame construction ensures cattle are safely restrained for routine, preventative or curative trimming. The adjustable, self-locking head gate enhances its ease of use and makes it suitable for handling cattle of any size. The adjustable height front leg blocks with tie-down system aids the trimming of front feet, whilst the rump chain secures the hind quarters whilst trimming the rear feet. The rump chain also adds to the versatility of this crush, making it suitable for AI or vet inspections.

The wide rubber bellyband, which works off a braked winch, folds nicely around the cow and is located to ensure a comfortable, but secure, support position. The back leg is also lifted via a braked winch, adding to the overall safety for the operator.

FEATURES & BENEFITS

- Strong, ergonomically designed galvanised steel frame construction
- Adjustable self-locking head gate
- Adjustable height wooden front leg blocks with tie-down system
- Galvanised steel tread-plate flooring
- Wide rubber bellyband
- Braked winches on rear leg lift and bellyband
- Rear rump chain

OPTIONAL EXTRAS

Electric Rear Leg Hoist

A tried and tested, heavy duty electric winch to take the effort and back ache out of lifting hind legs. Comes complete with a remote control handset, rope and leg strap.

Spring-assisted Rear Rump Bar

This market-leading rump bar incorporates internal springs so that hind legs are held securely, yet comfortably, to reduce the risk of sudden movement when trimming with either knives or grinders.

Side-opening Panels

To add to the versatility of this crush, these full access opening side panels allow clear access to cattle for vet inspections/procedures, clipping, mothering, etc.

Two-section Galvanised Steel Rear Gates

A pair of two-sectioned, hinged gates provide an easier way of guiding cattle into the crush.

Front Leg Assembly with Hand Wind Ratchets

These well designed, angled front leg blocks with hand wind ratchets enable you to safely lift front feet onto the block and tie down securely to reduce movement whilst trimming.

Non-slip Rubber Flooring

Our bubble top rubber matting improves cattle comfort and stability.
